

INDEX TO LEARNING 1975-1976

Learning magazine went through three years without publishing an index. Now that in our fourth year the omission has been corrected, we know why we were so neglectful (wise) in the past: indexes are monsters! Categorizing most articles is like nailing jello to the wall. And the richer, more diversified the article, the more frustrating the task becomes.

But, alas, when you reach index age there's no turning back. So

here for your convenience and/or enjoyment is a list of this year's editorial fare.

The index has three sections: TITLE, AUTHOR and SUBJECT. The first two classifications are pretty straightforward—simple alphabetical listings. The SUBJECT index, however, is subdivided into three parts: Classroom Practice, General Interest and Product Reviews. Under Classroom Practice you'll find how-to articles—classroom-tested teach-

ing ideas, practical techniques and approaches. Public affairs stories, research and theory are indexed under General Interest.

The ideas and stories from departments are indicated as such (Dept.). They are usually much shorter than feature articles.

Teachers' books, children's books, classroom materials, and films and filmstrips reviewed are indexed by title under the Product Reviews heading. Happy hunting!
